

IWTRC travel support for ECSs and students:

The TRC will provide travel support to early career scientists (ECSs) and students interested in studying at a TRC member's university and attending the IWTRC.

Although we would like to strive to meet the requests for travel expenses for many as possible, please understand that due to our budget constraints, we cannot guarantee that all requests will be fulfilled. Therefore, the TRC will conduct selection based on the application form and notify applicants of the results in early September. We encourage applicants to make their presentation at the IWTRC; however, we will also accept applications from students who wish to attend without presenting. In the latter case, please note that the possibility of receiving support will be lower.

To apply for the IWTRC travel support for students and early career scientists, please fill all the items on the application form, submit it to the IWTRC secretariat (iwtrc-info@ynu.ac.jp) by 23 August Fri (JST), 2024.

Please do not expand the form and fill out no more than two pages. If you have any problems to submit the form, please contact us at the above address.

TRC International Members Qualifications:

- Non-Japanese researchers, technicians, and students who have an interest in typhoon and/or tropical cyclone research and possess the ability to communicate effectively with TRC members in English or Japanese, approve activities of the Typhoon Research and Technology Center (TRC). A list of names of the TRC International Members will be displayed on the TRC webpage.
- The TRC International Members are strongly encouraged to participate in workshops, particularly the annual IWTRC organized by the TRC, fostering research collaboration among participants. They are also expected to share the results of research conducted in TRC activities within their respective countries or regions.
